Children's Trunks.....25c to \$2.00  
Doll Cradles and Beds.....10c to 50c

Our line of Dolls is the largest and most complete in the city. On account of a surplus of Rubber Dolls we will close them out at cost.

**China and Glassware.**

These goods on account of their being fragile and easily damaged are frequently sold at large profits. Not so with us. We handle these goods at the same margin as our other stock, hence you will find our prices reasonable.

**Juvenile Books.**

We believe we can take pride in the line we show, it certainly is more complete than ever before.

**Toys, Celluloid Goods, Albums, Etc.**

It is impossible to enumerate all the things. We invite you to come and see. Our business is to show goods and we consider it a pleasure if you will come and inspect our stock.

## FINE POULTRY SHOW.

On Tuesday the second annual show of the Holland Poultry & Pet Stock Association opened at the opera house. The greatest interest was taken by the poultry fanciers and the exhibitors are twice as many as last year. Among the exhibitors are Ralph Westveld, Jacob Westveld, J. B. Hadden, Wm. Visser, E. Cotts, A. Van der Hill, Harry Strowenjans, Benj. Wolters, Jas. L. Conkey, C. C. St. Clair, J. W. Visscher, Dick Ver Hulst, Henry Lugers, John Verhoef, James Van der Hill, J. B. Humphrey, Anton Self, Jr., L. D. Visser, Jr., Jacob Van der Schraff, E. B. Westerhof, D. Dogger, C. De Keyser, J. Y. Huizinga, Tony Boven, Wm. Greensmith, L. S. Sprietema, Wm. Brusse, John C. Visser, J. Zuidewind, M. J. Cook, Wallace Visscher and Ernie Meyer. The exhibitors from outside towns are Paul Lambromboise of Mt. Pleasant, A. B. Buck of South Monterey, W. M. Greenfield of Charlotte, C. C. Freese of La Porte, Ind., and C. J. Oldfield of Cedar Springs. There are nearly all the varieties of chickens, many coops of turkeys, ducks, pigeons and Belgian hares. John Schipper of Overisel is the largest exhibitor, having 52 birds there.

A fine display of dressed poultry is made by H. E. Bradshaw. We will publish a list of the prize winners next week. Judge Sharp Butterfield, one of the best poultry judges in the state, speaks very highly of the Holland show. The attendance has been good, considering the cold and stormy weather.

## FRANCHISE MATTER SETTLED.

The difficulties between the city and the street railway company have been satisfactorily adjusted. The ordinance passed by the council this week is published in this issue.

## WILL ENTERTAIN EMPLOYEES.

## PUBLIC SALE.

On Friday, Dec. 27, at 10 a. m., at the farm of Leendert Bareman, 2 1/2 miles northwest of the Zeeland depot.

## THE CENTURY FORUM.

The members of the Century Forum, a high school debating society, extend a cordial invitation to the general public, and especially to the fathers and mothers of pupils, to attend a meeting of the society in the assembly room of the high school building, at half past seven this evening. An especially interesting program will be given, the subject of debate being of vital interest to every patriotic and thinking American. It is: "Resolved, that the present freedom of expression of thought in the United States is so detrimental to the national welfare as to require special legislation."

The Century Forum was organized this year, and membership is limited to the senior and junior members of the high school. It is doing good work in offering to members an excellent chance to learn how to take part in public meetings and discussions, and in training them to easily address an audience. It also affords the public an opportunity to show its interest in the schools by seeing what is being done by the pupils.

The meetings, held twice a month, are well worth attending, for one may expect a very entertaining program, consisting of music, declamations, recitations and a debate on some modern subject. Come this evening and prove all this yourself.

The public schools close to-day for the holidays and will open again Jan. 2.

The sugar factory was laid up Monday and Tuesday for want of coal. A supply was received so that work was resumed. Between four million and five million pounds of sugar have been turned out.

The executive committee, appointed at the local option mass meeting held at Allegan Nov. 20, have decided that the time is not ripe for the pressing of the question of local option at the next election. The work was not commenced in time to perfect a thorough organization and without this success is doubtful. The members of the committee feel that the agitation has been of benefit and shall continue an "educational campaign" and feel confident that a county organization will be perfected which shall press the work to a successful issue.—Fennville Herald.

**AN ENGLISHMAN ON THE BOER WAR.**  
Mr. Frederick Harrison, the noted English writer, asserts that England is being slowly bled to death, while the government systematically suppresses the truth and diffuses deceptive reports. He said:

"Four successive attempts have been made in four successive centuries to accomplish what we are trying to accomplish in South Africa. All have failed. Philip II of Spain in the sixteenth century, possessing unequalled naval and military forces and backed by the undivided patriotism of the Spanish people, tried for eighty years to subjugate Holland, only to bring disaster on his own country and to stimulate Holland to great feats of national progress. "In the seventeenth century Louis XIV of France took up the task that ruined Spain. He wrecked the French monarchy and almost wrecked France, but Holland continued to flourish. George III of England, in the eighteenth century, tried the policy of insolence and nonconcession upon our American colonists, driving them out of the empire and bringing vast loss and humiliation upon ourselves. "Napoleon III of France, in the nineteenth century, sacrificed 100,000 French men in an attempt to fasten French supremacy on distracted Mexico, but that country, despite its distraction, rallied to the standard of nationalism and set at naught the far mightier strength of the invader. "Thus history teaches us unmistakably that one white people, however great and powerful, cannot politically annihilate another. On the contrary, small, hardy nationalities thrive under tyranny and attack, while their assailants either quit the struggle or sink into exhaustion and confusion."

**HOME CURED HAMS.**  
An Easy Method Which Dispenses With Pork Barrel and Smokehouse.  
It is unnecessary to have a barrel in which to make a pickle. We have had excellent success by the following method: Cut off the skin, except around the end, so that the salt and smoke will act more easily and quickly. The skin is left around the small end to hold the cure to hang them up by. A small tea-cupful of fine salt is rubbed together with two heaping tablespoonsful of powdered saltpeter. This mixture is heated and rubbed over the hams.  
For convenience each ham is placed on a folded newspaper, with a sheet of plain white or manilla paper next the ham, and whenever the ham is moved it is done by placing the hands under the paper on which it rests. While curing, the hams are kept in a cool place, but are not allowed to freeze. The mixture is used every few days for about three weeks, and it is impossible to get the hams too salt in this way. Two or three times during the curing process we rub the hams with molasses into which a little soda has been stirred.

For a smokehouse a tight barrel is all that is necessary. Some live coals are put in an old pan that has been partly filled with ashes. Corncocks are broken up and laid on the coals. They do not blaze, but give a dense smoke. When the smoke is going nicely, the pan is quickly placed on the bottom of the barrel, and a stick on which the hams are strung is placed across the top. If the cord is short, the hams do not hang near enough to the fire to do any harm.  
The barrel is covered first with a newspaper, then with an old piece of sacking or carpeting, and the whole pressed down with boards. The hams are left here for three or four hours, the longer the better. The smoking process can be repeated as many times as desired, but probably two or three times would be enough for most families. They are not ready to eat for at least two weeks after smoking. In fact, the longer they are kept, provided they do not spoil, the better they are, concludes an American Agriculturist writer who is authority for the foregoing.

**An Evangelist's Story.**  
"I suffered for years with a bronchial or lung trouble and tried various remedies but did not obtain permanent relief until I commenced using One Minute Cough cure," writes Rev. James Kirkman, Evangelist of Belle River, Ill. "I have no hesitation in recommending it to all sufferers from malady of this kind." One Minute Cough Cure affords immediate relief for coughs, colds and all kinds of throat and lung troubles. For croup it is unequalled. Absolutely safe. Very pleasant to take, never fails and is really a favorite with the children. They like it. For sale by L. Kramer, Holland.

# SCHLEY HIT HARD.

**Majority of Inquiry Court Condemns Admiral.**

**DEWEY UPHOLDS SCHLEY**

**And Issues a Minority Report. That Effect—In All Probability—Further Proceedings Will Be Official Opinions Not Forthcoming.**

Washington, Dec. 14.—The most prolonged, interesting and important naval tribunal ever held in this country came to a close yesterday, having in open and secret session lasted three months, short of one week, when Secretary Long was handed the findings of the court of inquiry which inquired into the conduct of Rear Admiral Schley during the Santiago campaign. For seven weeks the court heard testimony and for fully a month it deliberated upon that mass of evidence, finally reaching the conclusions announced yesterday. The result was a complete surprise, and it is probable that no prophesy has approached the truth. Instead of one report, there are two. Both are signed by George Dewey, president, and by Sam C. Lemly, as judge advocate. This is a form said to be recognized in all courts of inquiry, the signatures of the other members not being necessary. When told the report, Admiral Schley evinced no signs of nervousness over the outcome. When the conclusions of Admiral Dewey were read to him Admiral Schley showed his pleasure, and it was evident from his manner that he regarded the statement from Admiral Dewey as a vindication of his cause.

**The Majority Opinion.**  
The majority report condemns Admiral Schley on 11 points, while Admiral Dewey sustains him in most particulars. The majority opinion finds, in brief, that Admiral Schley should have proceeded with the utmost dispatch to Cienfuegos and maintained a close blockade; that he should have endeavored to have obtained information of the Spanish squadron there, that he should not have made the retrograde movement; that he should have obeyed the department's orders; that he should have endeavored to capture the Spanish vessels in Santiago; that he did not do his utmost to destroy the Colon; that he caused the squadron to lose distance in the loop of the Brooklyn; that he thereby caused the Texas to back; that he did injustice to Hodgson; that his conduct in the campaign was characterized by vacillation, dilatoriness and lack of enterprise; that his official reports of the coal supply were misleading and inaccurate; that his conduct during the battle was self-possessed and that he encouraged in his own person his subordinate officers and men.

Judge Advocate.  
**Admiral Dewey's Opinion.**  
Admiral Dewey in his report says that the passage to Cienfuegos was made with all dispatch; that in view of his coal supply the blockade of Cienfuegos was effective; that he allowed the Adula to enter Cienfuegos to get information; that his passage to Santiago was with as much dispatch as possible, keeping the squadron together; that the blockade of Santiago was effective, and finally, that he was the senior officer off Santiago, in absolute command and entitled to the credit due for the glorious victory which resulted in the total destruction of the Spanish ships.

**Raynor's Protest Completed.**  
Baltimore, Dec. 18.—Atty-Gen. Isidor Raynor, counsel for Admiral Schley, has finished the draft of the formal document to be delivered to Secretary of the Navy Long, protesting against the finding of the court of inquiry. Today Mr. Raynor will carry the draft of the protest to Washington and after he and Admiral Schley have conferred over it a copy will be prepared for transmission to Secretary Long.

**Protest Dewey's Findings.**  
New York, Dec. 18.—Stanton & Campbell, attorneys for Rear Admiral Sampson, are engaged in drawing up a formal protest against the minority finding of Admiral Dewey in the Schley court of inquiry.

**MRS. BONINE ACQUITTED**

**Of Murder of James Seymour Ayres—She Will Remain in Washington.**  
Washington, Dec. 14.—The jury in the trial of Mrs. Bonine, accused of the murder of James Seymour Ayres, Jr., the young census office clerk killed in the Kenmore hotel last spring, returned a verdict last night of not guilty, after being out about four hours.

The defendant was set at liberty. Washington, Dec. 16.—Mrs. Bonine, who was acquitted of the charge of having murdered James Seymour Ayres, is not going to leave Washington after all, at least not for the present. She has been at home to all callers and to every one she said that she has discussed no plans for the future. Now that the trial is over Mrs. Bonine says that she does not blame the people for demanding that she be tried, as she recognizes that before all the facts were made known it was necessary for her to clear her skirts.

# HARVEST OF DEATH.

**Three Disastrous Railroad Accidents Occurred Sunday.**

Rockford, Ill., Dec. 16.—Eight or more lives were lost in the wreck of an eastbound Omaha-Chicago express train on the Illinois Central railroad near Perryville, Ill., at 1 o'clock Sunday morning. The express train collided head-on with a freight train, both running at full speed. An oil tank car in the freight train exploded throwing burning oil over the wreck, and in an instant the entire mass of wreckage was in flames. Every coach of the passenger train and all of the freight cars, except one tank car and a freight car, were burned. The bodies of the dead were burned in the wreck. The temperature was nearly 20 degrees below zero and the suffering of those who escaped injury was intense. The scantily-clad passengers from the sleepers suffered even more than the other passengers. Not more than half a dozen persons escaped from the wreck uninjured.

**Spreading Rails Cause Fatal Wreck in Montana.**  
Helena, Mont., Dec. 16.—A special from Kalispell says a wreck occurred on the Great Northern railway near Essex, in the Rocky mountains, soon after midnight Sunday morning. The engine, mail car and smoker remained on the track, but all the other cars were derailed. Some of the cars were overturned and all were more or less wrecked. The accident was due to rails spreading.

Among the killed was Otto Erickson, going from Sweden to California. Seven others were killed, but their names have not been learned.

**Through a Bridge.**  
Williamsport, Pa., Dec. 16.—A freight train on the Philadelphia & Erie district of the Pennsylvania railroad went through the bridge spanning Locoming creek, between this city and Newberry, at 6 o'clock Sunday morning. Three lives were lost.

The dead: John Martz, engineer; Frederick Glass, fireman; George Harley, brakeman. All resided at Sunbury.

**HORRIBLE QUADRUPE SUICIDE.**

**Four Persons Die By Chloroform Route Together.**

Columbus, O., Dec. 18.—Two young women and two young men were found dead last night in rooms at a boarding house, 52 East Russell street, and evidence points to a quadruple suicide, deliberately planned.

The two couples went to the boarding house Sunday and secured adjoining rooms, claiming they were married. Nothing was seen of them Tuesday, and though the rooms remained locked and no response could be secured to repeated calls, suspicion was not aroused until last night. Finally the doors to the rooms were forced and the occupants were discovered lying on the beds dead. The key holes and cracks around the doors had been closed with rags and the fumes of chloroform filled the rooms, disclosing the cause of death. It was evident that both couples had planned suicide, but the motive is not known.

**C. E. SMITH RESIGNS.**

Washington, Dec. 18.—Charles Emory Smith of Philadelphia has tendered to the president his formal resignation as postmaster-general to take effect early next month, and Henry C. Payne of Wisconsin, vice-chairman of the republican national committee, has accepted the tender of the office to which he will be nominated immediately after the holiday recess. Mr. Smith has agreed to remain until Jan. 15, if necessary, but will return immediately thereafter to resume the editorship of the Philadelphia Press. All of the members of the cabinet expressed their profound regret, and the president paid a very impressive tribute to the services and personality of the retiring member of his official family. He said that he had sought to persuade Mr. Smith to alter his determination and to remain in the cabinet, but without success, and he finally accepted Mr. Smith's reasons as decisive.

**Succeeded in Telegraphing Across Ocean Without Wires.**

St. Johns, N. F., Dec. 16.—Signor Marconi announced the most wonderful scientific discovery of modern times Saturday night, in stating that he had received electric signals across the Atlantic ocean from his station in Cornwall, England. He explains that before leaving England he made plans for accomplishing this result, for, while his primary object was to communicate with ocean liners in mid-ocean, he hoped also to succeed in attaining the wonderful scientific achievement of wireless telegraphy across the Atlantic.

**MRS. DENNIS'S ASSAULT.**

**Suicide of a Printer Brings Forth Possible Clue.**

Washington, Dec. 17.—Samuel C. Presley, a printer, 39 years old, was found dead in bed yesterday morning in his room at 1119 K street, the house adjoining that of Mrs. Ada Gilbert Dennis, the modiste who was mysteriously assaulted a week ago in her apartments. Presley's death was attributed to suicide by inhaling illuminating gas.

Presley left letters directing his burial at Many, La. The police found in his room a key fitting the vestibule door of the house where Mrs. Dennis was assaulted. A boy named Lonsdale, who saw a man emerging from the Dennis house late on the night of the attempted murder, was taken to see the body and said he was quite sure he was the man, and a slouch hat, the kind worn by the man he saw, was found in the room. Stains thought to be blood were also found on Presley's garments.

**Child Burned to Death.**

Athens, Ga., Dec. 17.—Lella Lambert, an 8-year-old child, was burned to death in her home last night by an unknown young negro boy, whom she allowed in the house during the absence of her parents.

Miss Sarah Gehring was roasted to death last evening at Logansport, Ind. A hanging lamp broke from its fastening in the ceiling and fell, striking the young woman upon the head and exploding.

The southwest is experiencing the severest storm this winter. The storm will prove of great value to farmers. Many small streams had gone dry, leaving no water for stock, and wheat needed moisture badly.

**FLCDS IN THE EAST.**

**Wrought Havoc With Railroads—Several Were Drowned.**

Portland, Me., Dec. 17.—This state is suffering from one of the severest storms in its history. Floods and washouts have done tremendous damage. The Maine Central railroad has moved no trains since early Sunday.

The Bangor & Aroostock railroad and the Canadian Pacific lines are in nearly as bad condition. The great mills on the Androscoggin, Kennebec and Penobscot rivers were almost all unable to start their machinery yesterday morning because of high water, and thousands of men are temporarily without work.

Many cities and towns report that great damage has been done to streets, families have been driven from their homes and street railways are inoperative from floods. Many districts are inaccessible because of bad roads. Telegraphic and telephonic communication, though interrupted between numerous points, has stood the strain well. Up to last night only one death had been reported, that of a fireman named Patton on the Canadian Pacific railroad, whose engine plunged into a washout.

A similar accident on the Maine Central resulted in the injury of three persons, one of whom may die.

Madison, on the upper Kennebec river, sustained the greatest damage from floods of any place, it being half a million dollars. Logs and ice crushed buildings and overturned many others, especially in one section of the town where there are large mills.

**Pennsylvania Suffers Terribly.**  
Towanda, Pa., Dec. 17.—The complete story of the damage wrought in Bradford county by the unprecedented flood of Saturday night and Sunday is coming in slowly. Three lives were lost, two others will go from exposure and the monetary loss to property is beyond present estimate.

At Greenwood a house occupied by Wm. S. Reynolds and his wife, both over 70 years, and their grandson of 16 years, was tipped over. The man was drowned, but the boy succeeded in getting himself and the woman into a street where they tied themselves fast with strips of clothing. They had a soaking wet bed quilt to wrap

themselves in, and for five hours from midnight to 7 o'clock in the morning were exposed to the zero weather. Both were terribly frozen and the woman will die. Charles Merritt, 18 years old, was returning from a neighbor's when the flood overtook him.

**Rivers Out of Their Banks.**  
New York, Dec. 18.—Warm weather and rain followed by high winds have resulted in fearful damage all over New York state. On Saturday the snows in the northern sections thawed rapidly, causing the rivers and creeks to rise, and the valleys were inundated. Heavy rain followed during the night, accompanied by winds of great velocity. Trains were blocked for many hours, landslides were frequent and in the lowlands and valleys hundreds of dwellings were flooded, while the damage to farm lands and buildings is very great. Few lives so far have been reported as lost.

**CANAL TREATY RATIFIED.**

Washington, Dec. 17.—The senate yesterday ratified the Hay-Pauncefote isthmian canal treaty by the decisive vote of 72 to 6. The vote was reached a few minutes before 5 o'clock, after almost five hours' discussion behind closed doors. There were no sensational incidents during this entire t'zoo. The debate was confined exclusively to a discussion of the merits of the agreement and the policy of its provisions. The principal speech of the day was made by Senator Teller, in opposition to the treaty, and he was followed in rapid succession by 12 or 15 other senators, who spoke briefly either for or against the motion to ratify.

**CAPTURED AT LAST.**  
London, Dec. 18.—A dispatch from Kitchener announces that Commandant Kritzinger, the famous Boer commander, has been captured, badly wounded, by General French. Kritzinger was trying to break the block-house cordon at Hanover road.

**DURING LAST OF MONTH**

**A Highly Interesting Program Has Been Prepared, Including an Address by Booker T. Washington on a Southern Educational Topic.**

Grand Rapids, Mich., Dec. 18.—The annual meeting of the Michigan State Teachers' association will be held in this city Dec. 26-28. The sessions will be held in the Auditorium and the expense for rental, lighting, etc., will be defrayed by the citizens. At the opening session Thursday afternoon, Dec. 26, Mayor Perry will welcome the teachers to the city, and President A. D. Thompson of Romeo will respond. Following these ceremonies, Wilbur F. Gordy of Hartford, Conn., will deliver an address on "Methods in history," and in the evening Booker T. Washington will speak on "Industrial education at the south." Friday morning addresses will be given by James L. Hughes of Toronto on "Dickens as an educator," and Mrs. Anna B. Comstock of Cornell on "Nature studies as an aid to the grade teachers." Friday evening Graham Taylor of Chicago will deliver an address.

Saturday morning Prof. Hughes will deliver an address on "Child study," and the convention will close with a symposium on educational topics. Superintendent E. C. Warriner of Saginaw leading in the consideration of "Administration," Prof. S. B. Laird of Ypsilanti in "Instruction," Prof. Geo. N. Ellis of Olivet in "Secondary schools and college work," and State Supt. Delos Fall in "Rural schools."

**FIVE PRISONERS PAROLED.**

**Governor Bliss Opens His Heart—But One Goes Back.**

Lansing, Mich., Dec. 17.—The following paroles were granted by Governor Bliss yesterday: Thomas L. O'Keefe, sent from Gogebic county in December, 1900, to Marquette prison for one and a half years for robbery; Michael Savant, sent from Gogebic county in February, 1896, to Marquette for 10 years for manslaughter; George Giles, sent from Oakland county in May, 1898, to Ionia for seven years for perjury; Charles S. Ray, sent from Lenawee county in November, 1899, to Ionia for four years for falsifying a check; and Willis O. Humphrie, sent from Arenac county in June, 1892, to Jackson for 16 years for criminal assault.

The governor revoked the parole of Charles Calkins and ordered him returned to prison. Calkins was sent from Oakland county in February, 1898, to Jackson for arson. Since he was paroled by Governor Pingree in November, 1900, he has been habitually intoxicated, thus persistently violating the terms of his parole.

**Hiccoughed for a Week.**  
Lansing, Mich., Dec. 18.—Charles H. Lemon, a well known merchant, was seized with a fit of hiccoughing a week ago and the doctors are unable to relieve him. His condition is serious.

**MICHIGAN BRIEFS.**

Twenty-two saloonists of Bay City pleaded guilty to the charge of selling liquor on July 4 last.

Benton Harbor common council voted to bond the city for \$77,000 for the purpose of paving.

The Michigan Alkali Co. of Detroit is to distribute 600 turkeys among its employees for Christmas.

Mrs. William Letsen of Grand Ledge is dead by reason of being severely burned in an explosion caused from lighting a fire with kerosene.

Fire destroyed the residence of Mrs. Reade at Republic. The loss is \$2,900, with \$500 insurance. Nothing was saved.

The American Rolling Mill Co. of Muskegon has reorganized with a capital of \$1,000,000. The former capital of the company was \$300,000.

The Detroit Sugar Co. will build large additional sheds at Rochester and a double loop in the electric railway, which will allow 40 cars to be unloaded at once.

Architect E. A. Bowd of Lansing Monday completed plans for the \$40,000 administration building to be constructed at the home for the feeble minded at Lapeer.

A runaway team of horses dashed through the display window of Park Bros.' drug store at Grand Rapids Monday night and did \$500 worth of damage.

The Phoenix Furniture Co. of Grand Rapids received 65 logs of rare timber from Africa, to manufacture into furniture. The duty on the importation exceeded \$4,000.

William Laverance of Ann Arbor was struck by a Chelsea car at the city limits and is at the hospital in a precarious condition. Both of his horses were killed.

Charles Domes of St. Joseph was severely injured by being struck on the head by the falling of overhead shafting while working in one of the local woolen mills.

A native-born Englishman, in business in Owosso, became so wrought up about the Boer war that he sold out his business, packed his grip, went to England and enlisted and is now on his way to South Africa.

Canvassers who have been out among the farmers the past week at East Tawas report having secured acreage for sugar beets enough to warrant the building of a beet sugar factory there.

Mrs. McLane, a Port Huron resident, has sued the Michigan Central for the loss of her voice, of which she claims to have been deprived through having had to wait in the cold for a train.

## DAIRY HUSBANDRY.

B. H. Otis, Head of New Department in Kansas College.

The creation of a chair of dairy husbandry by the regents of the Kansas Agricultural college marks another advance in the dairy work of the state, says The Creamery Journal.

Professor D. H. Otis, who is at the head of this department, was born and raised on a dairy farm in Kansas. He graduated from the Kansas Agricultural college in 1892 and took his master's degree in 1897. He was appointed assistant in agriculture in December, 1902, and assistant professor of dairy-

PROFESSOR D. H. OTIS.

ing in July, 1900, and professor of dairy husbandry in July, 1901. He also took a short course in dairying at the Iowa Agricultural college.

Mr. Otis has had charge of classes for the past four years. In teaching Mr. Otis' aim has been to give the science of the subject and at the same time to keep before the minds of the students the money making application of the work. While Mr. Otis has had considerable experience in making butter and for two years gave the instruction in butter making at the Kansas Dairy school his chief attention has been given to the farm end of the dairy work, in the selection, breeding, feeding and handling of the dairy cow and her calf. As a member of the experiment station force Mr. Otis has done considerable work along the line of feeding and developing the dairy cow and her calf in testing the variations in the quality of milk, in testing different feeds and combinations of feeds for the largest production of milk and in testing the effect of different feeds upon the quality of butter.

### Care of Dairy Cows.

It is the best plan to clean out the gutters twice each day and not allow a great accumulation of matter at a time, says the New York Tribune. With a good floor and tight gutters there should be material at hand for use as absorbents and deodorizers. Brushing and carding the cows each day tend to cleanliness and are worth their cost in increased milk. There should be plenty of bedding, and fresh materials should be supplied as fast as it is worn out and disappears in the gutter. Long horse manure fresh from the stable makes a fine absorbent, better than muck, and then the mixing of the two manures makes each the more valuable. Land plaster and South Carolina rock, acidulated, make fine deodorizers and add value to the manure carried away, as they, on the one hand, strengthen the manure in phosphoric acid and in the "fixing" of ammonia. To our liking clay road dust is the equal of either as a deodorizer.

### Potency of Young Bulls.

We think that a good bull that has been kept without being allowed to get too fat and not given too much service should get from 80 to 90 per cent of his cows with calf at fourteen months old, and we doubt if there is much difference in the breeds at that age, says American Cultivator. We have known the Jersey to get calves much younger, but do not think he would be any more sure as a stock getter or capable of doing more service at fourteen or fifteen months old than one from the larger breeds. Often a young bull may get an old cow with calf when an older one would fail, and those who cannot succeed in getting an old cow with calf may well try a yearling bull.

### Cottonseed Hulls as Feed.

Tennessee experiment station states that properly used cottonseed hulls are a valuable addition to foodstuffs for milk cows. "We recommend as much as fifteen pounds of cottonseed hulls in the daily ration per 1,000 pounds live weight. A larger proportion has caused a weakening of the digestive powers, evidenced in some cases by a tendency to diarrhea, in others to constipation." Cottonseed meal can be fed safely for long periods as much as five pounds per day per 1,000 pounds live weight in the ration for cows giving milk. For butter making it is not advisable to exceed three pounds daily.

### To Clean Milk Utensils.

Rinse first with cold water and then wash thoroughly with hot water and afterward introduce live steam if possible. If this is not available, keep in boiling water for eight or ten minutes. Let them stand in the sun as much as possible.

### Dairy Notes.

Do not allow the milk to freeze. Never mix fresh milk with that which has been cooled.

Do not allow dogs, cats or loafers to be around at milking time.

Milk with dry hands. Never allow the hands to come in contact with the milk.

When cans are hauled far, they should be full and carried in a spring wagon.

## AN ORDINANCE

An ordinance to amend sections one, two, four, nine, eleven and twelve of an ordinance entitled, "An ordinance granting to Charles M. Humphrey and his assigns, and to a corporation hereafter to be organized under the provisions of Chapter 18 of Howell's Annotated Statutes of the State of Michigan, as amended, and to its successors and assigns, to which corporation when so organized, the said grantee shall assign this ordinance, the right to construct, maintain and operate street railways on certain streets, avenues and public places in the city of Holland and on such other streets, avenues and public places in said city, as may be hereafter designated," approved May 5, A. D. 1897, as amended by an ordinance passed January 4, A. D. 1898, and approved January 5, A. D. 1898, and as further amended by an ordinance passed May 27, A. D. 1898, and approved May 28, A. D. 1898; and as further amended by an ordinance passed October 5, A. D. 1898, and approved October 5, A. D. 1898; and as further amended by an ordinance passed March 28, A. D. 1900, and approved March 29, A. D. 1900; and as further amended by an ordinance passed May 24, A. D. 1900, and approved May 25, A. D. 1900, and as further amended by an ordinance passed November 25, A. D. 1901, and approved November 25, A. D. 1901.

### THE CITY OF HOLLAND

#### ORDINANCE:

Section 1. That the sections one, two, four, nine, eleven and twelve of an ordinance entitled, "An ordinance granting to Charles M. Humphrey and his assigns, and to a corporation hereafter to be organized under the provisions of Chapter 18 of Howell's Annotated Statutes of the State of Michigan, as amended, and to its successors and assigns, to which corporation when so organized, the said grantee shall assign this ordinance, the right to construct, maintain and operate street railways on certain streets, avenues and public places in the city of Holland and on such other streets, avenues and public places in said city as may be hereafter designated," approved May 5, A. D. 1897, as amended by an ordinance passed January 4, A. D. 1898, and approved January 5, A. D. 1898, and as further amended by an ordinance passed May 27, A. D. 1898, and approved May 28, A. D. 1898; and as further amended by an ordinance passed October 5, A. D. 1898, and approved October 5, A. D. 1898; and as further amended by an ordinance passed March 28, A. D. 1900, and approved March 29, A. D. 1900; and as further amended by an ordinance passed May 24, A. D. 1900, and approved May 25, A. D. 1900, and as further amended by an ordinance passed November 25, A. D. 1901, and approved November 25, A. D. 1901, be and the same are hereby amended so as to read as follows:

Sec. 1. That the consent, permission and authority are hereby granted to Charles M. Humphrey, and to his assigns, and to a corporation hereafter to be organized under the provisions of Chapter 18 of Howell's Annotated Statutes of the State of Michigan, as amended, and to its successors and assigns, to which said Charles M. Humphrey shall assign this franchise as hereinafter provided, to construct, maintain, use and operate single and double track street railways, with all necessary and convenient turn-outs, turn-tables, side-tracks, switches and connections in and along the streets, avenues and public places in the City of Holland, as hereinafter provided, and to operate thereon street railways for and during the term hereinafter specified, and in the manner and upon the conditions set forth in this ordinance. Provided, however, that no switches, turn-outs, side-tracks, "Y's" or turn-tables shall be constructed on any of the streets or avenues of said city without first submitting the plan, diagram and location thereof to the Common Council of said city for their approval. Permission, however, is hereby granted to said grantee, their successors and assigns, to construct one switch and one turnout on Eighth street west of River street, and on Van Raalte avenue respectively, without first obtaining further permission from said Common Council.

Sec. 2. That the said grantee, their successors and assigns, are hereby authorized and given the right to construct, maintain and operate single and double track street railways in, upon and through the following streets, avenues and public places in the city of Holland, to-wit: Commencing on Eighth street at the point where the Pere Marquette Railway crosses said street, immediately east of Land street; thence west on Eighth street to River street; thence south on River street to Thirteenth street; thence west on Thirteenth street to Harrison avenue; thence south on Harrison avenue to Sixteenth street; thence west on Sixteenth street to the end of said street; and thence on the north side of the highway along the north section line of section thirty-one (31) to the end of the highway. Said grantee, their successors and assigns, are also authorized to construct, maintain and operate a single track street railway in, upon and through Eighth street west of River street to Lake avenue and on the unnamed street running from the foot of First avenue to the waters of Black lake; thence on Lake avenue to the east line of lot seven (7), block two (2), of Hope College addition to the City of Holland; thence south on Van Raalte avenue from Lake avenue to Thirteenth street; also on Harrison avenue, between Thirteenth street and Twelfth street; but said grantee, their successors and assigns, shall not be required to construct, maintain and operate said street railway on that part of Sixteenth street lying west of Ottawa street. Provided, that the said grantee, their successors and assigns, shall not interfere with or place their track on Lake avenue west of the east line of lot seven, block two, of Hope College addition, in said City of Holland. Provided, further, that this grant to construct, maintain and operate said railway along Eighth street, west of River street, and along Lake and Van Raalte avenues, shall become void unless said part of said railway shall be completed and ready for use and operation on or before December 20, A. D. 1902. Provided, further, that if said grantee, their successors and assigns, shall desire to construct a double track street railway on Eighth street east of River street, they shall first obtain the consent of the Common Council of said city, and the city shall then pave between said tracks and up to the outside line of each of said tracks, and said grantee shall pave between the rails of each of said tracks. The grantee shall also have the right to build a "Y" to connect their track on Eighth street west of River street with their track on River street, said "Y" to be constructed in a workmanlike manner, and not before May 1, 1902. Said "Y" shall not be constructed unless the said grantee, their successors and assigns, with materials satisfactory to the City of Holland. The City of Holland shall pave the intersections of Eighth and River streets where said "Y" is situated in the same manner as said "Y" is to be paved, and the grantee shall pave only between the rails of said tracks at the intersection

tion of Eighth and River streets.

Sec. 4. Whenever the Common Council shall order the grading, paving or other improvements of any of the streets over which the lines of said railway shall have been constructed, or over which permission shall have been granted to construct the same, and such permission shall have been accepted, or shall have ordered said grading or other improvements, and said work shall not yet have been performed, then the said grantee shall, except as hereinafter provided, pay such proportion of the expense of such grading, paving or other improvements as the surface between the rails and said tracks of said railway and eight inches on the outside thereof shall bear to the entire surface improved, and whenever the city constructs crosswalks across any of the streets on which said railways are operated, said grantee, their successors and assigns, shall at the same time construct, of such materials and in such manner as the Common Council may designate, and of as good workmanship, crossings between the rails and tracks and eight inches on each side thereof. The said grantee shall have the right to pay the cost of such grading, paving or other improvements in installments, upon the same terms and conditions as the owners of the land abutting on said streets may be required or authorized to pay such assessments for grading, paving or other improvements. If at any time, it becomes necessary for said grantee, their successors and assigns, to relay or repair any of their said tracks, or to replace or remove any of their poles, or after any of the said streets shall have been paved, graded or improved, it becomes necessary to tear up said pavement, grading or improvement for such purpose, then said grantee, their successors and assigns, shall at their own expense and with the least possible delay, repair said street or replace said pavement, grading or improvement, leaving said street in as good condition as it was before being so disturbed by said grantee, their successors and assigns, and said grantee, their successors and assigns, shall otherwise and at all times, keep the street between the rails and tracks and eight inches on each side thereof, in as good condition and repairs as the remainder of the street; provided, also, if at any time it becomes necessary to remove or interfere with any of the tracks, poles or overhead equipment of said grantee, their successors and assigns, or any portion thereof, for the purpose of doing any work on said streets required by said city to be done, then said grantee, their successors and assigns, upon being notified by said city, shall immediately remove so much of their said tracks, poles and overhead equipment as may be necessary for such purpose, and thereafter replace the same at their own expense. All such work done or authorized to be done by said city shall be done if possible so as not to suspend the running of cars, but if it becomes necessary in doing such work to suspend the running of cars such work shall be done with the least possible delay.

Sec. 9. This ordinance is also granted with the understanding that said road may be operated for the purpose of carrying baggage, express, freight, and U. S. mail as well as passengers; and said grantee, their successors and assigns, are hereby authorized to charge for carrying baggage, express and freight, whatever amount may be reasonable therefor, except such parcels as passengers may conveniently carry with them on the cars, and to enter into contracts to carry freight, express, baggage and U. S. mail; provided, however, such express shall only be carried in modern combination express and baggage cars. The rates of fare for passengers for a single ride, for a continuous trip any distance in one direction over the lines of road of said grantee, their successors and assigns, in said city, as it now is or may hereafter become, shall not be more than five cents, for which the passenger shall be entitled to such ride and to a ticket or transfer check, to be given such passenger before leaving the car, good for a ride over any other line or route, operated by said grantee, their successors and assigns, within the City of Holland; provided that this provision shall not apply to any extension of the City of Holland westward beyond two miles from the present west limits of said city, and provided such transfer ticket is presented on the next regular car of such other route within one hour after such passenger leaves the car on which he paid the five cent fare and received such transfer ticket, if there be such car within such hour, and if not, then on the first car thereafter. Said grantee shall also at all times keep for sale round trip tickets from Holland City to Macatawa Park and return at a price of fifteen cents per ticket. Tickets must, however, be procured by passengers before boarding the cars, and the grantee must keep such tickets for sale at all times at four (4) or more convenient and suitable places in the City of Holland; which rate of fare shall not be reduced during the life of this ordinance without the consent of said grantee, their successors and assigns. Provided, further, that no freight except package freight, so-called, in combination express and baggage cars, and fruit and farm produce, shall be carried by said grantee, their successors and assigns, between the hours of seven o'clock in the morning and eight o'clock in the evening and no freight of any kind except fruit and farm produce, which may be carried between the hours of six o'clock in the evening and eight o'clock in the morning, shall be carried by said grantee, their successors and assigns, on River street and on Thirteenth street east of Van Raalte avenue, nor shall any freight be carried on the first day of the week, commonly called Sunday. Provided, further, that no train of more than six (6) freight cars shall be allowed to pass along any of said streets.

Sec. 11. The Common Council shall have the right to make reasonable regulations for running the cars during the entire year, which regulations shall only be made as the population of the city increases from time to time, in the matter following: From and after the fifth day of April, 1900, and up to the time when the population of said city shall have reached 15,000 or over, as ascertained by federal, state or city census, cars shall not be required to run each way oftener than every fifteen minutes from six o'clock A. M. to eleven o'clock P. M. Whenever said city shall have attained a population of 15,000 or over, as ascertained by federal, state or city census, cars shall not be required to run thereafter oftener than every ten minutes each way from six o'clock A. M. to eleven o'clock P. M. These provisions, however, are not intended to preclude the running of cars at such additional times as said grantee, their successors and assigns, may desire to operate the same, nor are such provisions intended to require the running of cars on Sunday. Provided, however, that the above provisions set forth in this section shall apply only to that part of said electric road lying between the Eighth street east of River street, on River street, south of Thirteenth street, on Harrison avenue, and on Sixteenth street.

Sec. 12. Cars to be used on said railway shall be run at a rate of speed not to exceed ten miles per hour on Eighth and River streets and not to exceed fourteen miles per hour on any of the other streets of said city, and any motorman or other person in charge of the operation of any car for violation of this provision shall be liable to a fine of not to exceed \$10 and costs of prosecution, upon conviction in any court of competent jurisdiction in the City of Holland, and upon the imposition of any such fine and costs, the justice or judge of such court may

make a further sentence, that in default of such payment thereof, such offender shall be imprisoned in the county jail of Ottawa County or in the city jail of said city, for any length of time not to exceed ten days.

At the intersection of streets whenever a passenger may desire to get on or off a car, such car shall be stopped and in such a manner as to leave the rear platform of the car slightly over the last crossing in the direction in which said car is going. Cars shall also be stopped in the same manner at all crosswalks in the middle of blocks to let passengers on or off the same. No freight cars shall be loaded or unloaded, or remain standing on any of the streets of the city. In case of a fire in the City of Holland, all cars shall stop wherever they may be when the fire alarm sounds or upon the approach of the fire apparatus, and shall remain standing sufficiently long to enable the fire department to reach the place of the fire or until the fire apparatus has passed said car.

Sec. 2. This ordinance shall take effect twenty days after its passage. Passed Dec. 18, A. D. 1901. Approved Dec. 19, A. D. 1901.

STATE OF MICHIGAN, COUNTY OF OTTAWA, ss.  
At a session of the Probate Court for the County of Ottawa, held at the Probate Office, in the City of Grand Haven, in said county, on Friday, the 13th day of December, in the year one thousand nine hundred and one.  
Present, Edward P. Kirby, Judge of Probate.  
In the matter of the estate of Harm Bakker, deceased.

On reading and filing the petition, duly verified, of Cornelius Ver Hulst, Administrator of the estate of said deceased, praying for the issuance of this Court to sell certain lands of said Harm Bakker, deceased, as in said petition described for purposes therein set forth.  
Thereupon it is Ordered, That Monday, the 18th day of January next at 10 o'clock in the forenoon, be assigned for the hearing of said petition, and that the heirs at law of said deceased, and all other persons interested in said estate are required to appear at a session of said Court, then to be held at the Probate Office in the City of Grand Haven, in said county, and show cause, if any there be, why the prayer of the petitioner should not be granted. And it is further Ordered, That said petitioner give notice to the persons interested in said estate, of the pendency of said petition, and the hearing thereof by causing a copy of this order to be published in the Ottawa County Times, a newspaper printed and circulated in said county of Ottawa for three successive weeks previous to said day of hearing.

The clerk reported statement from the Grand Rapids, Holland and Lake Michigan Rapid Railway Company, declining to accept Ordinance No. 205 passed and approved Nov. 25, 1901.

The clerk presented the following:  
STATE OF MICHIGAN.  
The Circuit Court for the county of Ottawa, in Chancery.

In the name of the people of the State of Michigan:  
To the City of Holland, a corporation, and to William Bruce, Mayor, and Peter A. Kleis, Peter Van den Tak, Gerrit Van Zanten, James Koe, Henry Geerlings, Henry Luidens, Jacob G. Van Putten, Rudolph H. Habermann, William Westhoek, Bernardus Riksen, aldermen, and William O. Van Eyck, clerk, constituting the common council of said city and George Nauta, street commissioner, and Fred Kamferbeek, city marshal of said city, and to their successors, attorneys, solicitors and agents, and each and every one of them, greeting:

Whereas, it has been represented to us, in the circuit court for the county of Ottawa, in Chancery, on the part of the Grand Rapids, Holland & Lake Michigan Rapid Railway, a corporation duly organized under the laws of the State of Michigan, complainant, that it has lately exhibited its Bill of Complaint against you, the said City of Holland, and Wm. Bruce, Mayor, and Peter A. Kleis, Peter Van den Tak, Gerrit Van Zanten, James Koe, Henry Geerlings, Henry Luidens, Jacob G. Van Putten, Rudolph H. Habermann, Wm. Westhoek, Bernardus Riksen, aldermen, and Wm. O. Van Eyck, clerk, constituting the common council of said city, and George Nauta, street commissioner, and Fred Kamferbeek, city marshal, of said city, defendants, to be relieved, touching the matters therein complained of, in which bill it is stated, among other things, that you are combining and confederating with others to injure said complainant touching the matters set forth in this bill, and that your actions and doings in the premises are contrary to equity and good conscience; we therefore, in consideration thereof, and of the particular matters in the said bill set forth, do strictly command you, the said City of Holland, and Wm. Bruce, Mayor, and Peter A. Kleis, Peter Van den Tak, Gerrit Van Zanten, James Koe, Henry Geerlings, Henry Luidens, Jacob G. Van Putten, Rudolph H. Habermann, Wm. Westhoek, Bernardus Riksen, aldermen, and Wm. O. Van Eyck, clerk, constituting the common council of said city, and George Nauta, street commissioner, and Fred Kamferbeek, city marshal, of said city, and the persons before mentioned, and each and every one of you, under the penalty of Ten Thousand Dollars, to be levied on your lands, goods and chattels, to our use, that you do absolutely desist and refrain from removing, tearing up, injuring, destroying, damaging, or in any manner interfering with or displacing the railway track or any part thereof, of the said Grand Rapids, Holland & Lake Michigan Rapid Railway, situated on Eighth street west of River street, in said city of Holland, and from in any manner ordering or directing any person to remove, tear up, interfere with, or displace such railway track, until the further order of this court.

Witness, The Honorable Philip Padgham, Circuit Judge, and the seal of the Circuit Court, at the City of Grand Haven this seventh day of December in the year one thousand nine hundred and one.

### PORT SHELDON.

Having some business to transact in the vicinity of Port Sheldon, I decided to call on old-time friends there, and once more stroll along the river—the weather being beautiful—and take a view of the much talked of Port Sheldon, resort. It certainly is a beautiful place for pleasure seekers and I thought as I gazed at old Lake Michigan what a fine place it would be to get a good supply of pure water for some city like Grand Rapids, where the water is none too good. After noting the changes throughout the country, I commenced calling on my friends. Thanksgiving was pleasantly spent by a few old friends at the home of H. J. Davis, and our hearts were truly thankful for the privilege of being once more able to meet all of them and enjoy a good chat and a Thanksgiving dinner. Many other things I was thankful for during my short call at Port Sheldon and Holland. The warm handshakes and hearty laughs at recalling old time jokes and sports, plainly showed that I had not been forgotten. But let me tell you a secret. When I arrived at Port Sheldon after so many years of absence, I found that one of my old friends, who had to all appearances forgotten me, was to be married. I'll not say what day. Everybody was invited but me, at least everybody was going but me. So after deliberating a short time I arrived at the idea that I was going too, and I am not sorry I went. The reception was a success, the presents were many and beautiful, and useful. Ireland and Germany were united. Everybody danced, yes, everyone was happy and glad to be there. And oh, wasn't I glad when I learned that I was not the only one who was there without a special invitation. Well, when we arrived the band, led by major Darwin Huff, played while the girls and boys tripped to the tune of old Zip Coon and other melodious strains in the gaily lighted parlors. And as I passed in, I noticed the mottoes over the door read, "No French need Apply." Well, as one must be sometimes sorry as well as glad, I was sorry to find so many gone. Some had gone their health and fortunes to retrieve in other climes, while others had gone to the land from which none ever return. "Many are the changes, since last we met, blushes have brightened and tears have been wept, friends have been scattered like roses in bloom, some to the bridal, and some to the tomb." There were many other friends whom I wished very much to have seen had it been possible.

Pepin Syrup Co., Monticello, Ill.  
Dear Sir:—For almost fifteen years I suffered from indigestion and last winter thought I would die, when my physician, Dr. A. J. Lleurance, of this place, advised my trying Dr. Caldwell's Syrup Pepsin, which I did, and two bottles cured me. It not only relieved me, but it cured me so that I have not been troubled since.  
If any one should offer me \$500 for the good Syrup Pepsin has done me, I would not think of taking it. No one can take your medicine without being convinced of its more than wonderful cures. I recommend it to all my friends as a laxative and stomach remedy.

## A TREE FUMIGATOR.

A Small Affair, Cheap, Easily Handled and Effective.

Fumigation with hydrocyanic acid gas has been recognized for some time as one of the most effective means of dealing with the San Jose scale and other scale insects. This method of treatment has been applied to nursery stock as well as to trees standing in orchards. The labor necessary for manipulating a tent or box covering for trees in orchards is under any circumstances considerable, and this gives im-

FRAMEWORK OF FUMIGATOR.

portance to the problem of devising a cheap, easily managed and effective covering for fumigating trees.

V. H. Lowe of the New York state station has recently described a fumigator designed for use on the smaller trees. The frame of this fumigator is constructed of pine strips three inches wide and seven-eighths of an inch thick, the strips being braced on three sides by double crosspieces midway between top and bottom and short braces at the angles, as shown. The base has but three sides, the fourth side being omitted so as to avoid the necessity of lifting the fumigator over the top of the tree. In order to strengthen the base two strips extend from the back strip of the base to the front end of the side strips. Two stouter strips are bolted on to the sides at convenient height for carrying the fumigator. The fourth side is separate from the rest of the fumigator, is made of the same material and fits tightly in place against the two inch flange on the face of the box.

The frame is covered with any gas tight material. Eight ounce duck treated with raw oil and white lead or shellac and oil is suitable for this purpose. As a precaution against tearing of the canvas at the top of the fumigator a wire net may be tacked on the inside of the frame so as to prevent the limbs from coming in contact with the canvas. The canvas may be sewed so that three sides are inclosed with one large sheet. Around the base of the fumigator a strip of canvas eighteen inches wide is securely tacked, and when the box is in place these strips lie on the ground and may be covered with dirt or, preferably, long sand bags of small diameter for preventing the escape of the gas. The movable face of the box rests upon a two inch flange, which is covered with felt so as to prevent leakage. The surface of the movable side which rests against the flange is covered with the same material. This movable side is forced into

FUMIGATOR IN OPERATION.

position and held by wooden buttons firmly bolted on to the frame. The cost of the fumigator, 10 by 6 by 6 feet, will vary from \$13 to \$18, depending upon the quality of the sheeting used and whether wire netting is used. Such a fumigator may be carried and operated by two men.

For operating the apparatus a bag of cyanide of potash is placed over the dish of acid, and a string tied to the bag is extended through a small hole in one of the strips of the frame. The string may then be gently pulled from the outside, when the cyanide will fall into the acid, after which the hole is closed with a wooden plug.

## Prize Winning New Plants.

The rose Mrs. Oliver Ames exhibited at the recent New York flower show won the prize of the Society of American Florists for the best new flower of American growth.

A new Dailiedouse carnation carried off second prize in this class, and a new foliage plant, Dracaena curtisii, received honorable mention.

## SUGAR BEET POINTERS.

What an Eastern Grower Thinks of the Advantages of the Industry.

A New York grower presents some items on the sugar beet industry, as follows, in Rural New Yorker: While other sources of raw material, such as forests, mines and salt beds, can be bought and controlled, to the enrichment of the few and the stunted support of the many who are employed, the growing of the sugar beet must remain in the hands of the farmers, and they can control the price if they will act together. A factory is of no use without sugar. A fair division of the profits must always be made and come directly to the farmer in cash. The sugar made from beets is chemically the same as that from cane and comes from the factory as granulated white sugar, needing no other refining and therefore independent of the trust.

## Benefits to the Farmer.

By engaging in the growing of sugar beets farmers will not only aid the general public, but will directly benefit themselves. The price of land which is found suitable for beet growing increases in selling value from \$4 to \$15. It is a crop which requires more labor for successful growing than the ordinary farm crop and thus gives more days' work to get pay for it. It brings larger pay for thought and skill, which in themselves cost no money or labor outlay, leaving a larger profit. The growing of sugar beets does not deplete the soil so fast as grain crops and still gives a larger return per acre.

## A Crop of Few Pests.

The crop is singularly free thus far from injury by insects and blights, is capable of withstanding drought better than any other crop from its manner of growing deep, is the least troubled in the fall, as freezing does not injure it, and, unlike any other crop, there are no unsalable portions.

## Boom in Michigan and New York.

The fact that the acreage has increased from small beginnings to 60,000 acres in Michigan and over 100 per cent in New York this last year is proof that the farmers in those regions find it profitable to grow beets for sugar at prices thus far paid. Mr. Orson Wolcott will receive \$1,800 from his 18 acres this season, which have not cost to exceed \$50 per acre, a net profit of \$70 per acre.

## The Value of Beet Pulp.

The pulp left after the sugar is obtained from the beets at the factory is used for feeding dairy cows and is proving cheap and good. It can be stored in a silo, a box or in a pile. It will not heat or spoil, as the fermentation necessary to make it "heat up" is caused by the sugar which has been taken out. In chemical value it is about equal to one-fifth its weight in hay, but in actual results it is worth more than this. It is made up of white strings which feel cold and slimy to the touch and which contain a large percentage of water. It is not eaten readily by animals at first, but cows soon learn to like it and sort it out from ensilage when mixed with it. At the price—50 cents per ton at the factory—where freight is not excessive it is well worthy of trial for milk producing. Some good results have been obtained by feeding the refuse molasses to fattening cattle, but its chief value is for vinegar making.

## Ten Years of Progress.

Nobody believed ten years ago that beet sugar would be practical, because the process of making it was complicated and expensive, but American genius is constantly improving the machinery. Many thought that beets rich enough to pay for sugar could only be grown in favored localities, but it is now proved that the areas are as large as the wheat belts in nearly every agricultural state. The prediction is made and seems not improbable that in a few years no sugar will need to be imported into this country.

## A Satisfactory Hoghouse.

I use the wigwam house, of which I have several kinds. It is the most satisfactory, says an American Agriculturist correspondent. It can be moved about the farm, thus saving and distributing all the manure and keeping

THE WIGWAM HOGHOUSE.

the animals always clean. These houses are built 8 by 8 feet square. The floor is on 2 by 4 runners. Lumber for the roof is 8 foot stuff put on weatherboard fashion. The house is about 7 feet high in the middle, the roof coming down to the floor on the outside. There is a door and a window in front and a door in the rear, so that when both doors are open the cool breeze blows through, and the hogs enjoy it hugely.

## To Tan Goats' Hide.

To tan goats' hide with the hair on an exchange gives the following recipe: Soak well in clear water. For one skin mix two pounds of salt and one of alum and spread on the flesh side and roll up and put away for two weeks. Then open, wash with clean water and when nearly dry rub thoroughly with bran on flesh side until dry and soft. Dye with aniline dyes.

## A REMARKABLE JERSEY.

Pride's Olga 4th Has All the Points of a Milk Producer.

At the recent stock show at the Pan-American exposition there was a very large exhibit of aged Jersey cows. Some of the finest cattle in the country were brought in competition for the prizes, says New England Homestead. First prize was awarded to Pride's Olga 4th (90,807), owned by Charles A. Sweet.

She is a remarkable animal and embodies most of the good points required for a typical cow of her class, as shown in the illustration. She is large and solid, of a dark fawn color, with

PERFECTLY BALANCED UDDER.

an enormous, well formed and perfectly balanced udder, large tortuous milk veins, great barrel, slim neck, dish face, incurving horns and keen but gentle eyes.

As a two-year-old she gave 2424 pounds of milk and made 15 pounds 2 ounces of butter in seven days. Just before entering the contest at the Pan-American she made for one day a milk record of 65 1/4 pounds, seven days 447 pounds 2 ounces and in thirty-one days 1,941 pounds 14 ounces, in 113 days 6,359 pounds. Previous to her last calf, May 10, she gave 12,000 pounds of milk in eleven months. Pride's Olga 4th was born Aug. 2, 1893. She was sired by Melia Ann's Stoke Pogis (23,042). Her dam was Pride's Olga (37,189), who has six tested daughters and another to be tested soon.

## WOMEN AND JEWELS.

Jewels, candy, flowers, man—that is the order of a woman's preferences. Jewels form a magnet of mighty power to the average woman. Even that greatest of all jewels, health, is often ruined in the strenuous efforts to make or save the money to purchase them. If a woman will risk her health to get a coveted gem, then let her fortify herself against the insidious consequences of coughs, colds and bronchial affections by the regular use of Dr. Boesche's German Syrup. It will promptly arrest consumption in its early stages and heal the affected lungs and bronchial tubes and drive the dread disease from the system. It is not a cure-all, but it is a certain cure for coughs, colds and all bronchial troubles. You can get Dr. G. G. Green's reliable remedies at Heber Walsh's drug store, Holland, Mich.

**DETROIT MAN ASSAULTED.**  
And by the Lieut.-Governor of Montana—He May Die.  
Missoula, Mont., Dec. 17.—James Blockley, T. B. Plunkett and Theodore Booth, strangers in Missoula, while returning to their hotel from a party given by Mrs. Frank Higgins, mother of the lieutenant-governor of the state, were waylaid by three men. Booth, who represented the Globe Tobacco Co. of Detroit, Mich., sustained a fractured skull and may die. His companions were unhurt.  
The sensational feature of the assault lies in the fact that Lieut.-Gov. Higgins was one of the assaulting party, and was assisted by his brother, who is a deputy state game warden. The third assailant is said to have been W. W. McCormick, a deputy sheriff. Higgins admitted his participation in the assault, but refused to discuss it other than to say it was deserved. Presumably it grew out of some occurrences at the Higgins party.

**NEW BREED OF POULTRY.**  
English Bred Anconas Are Good Layers and Nice Broilers.  
The Ancona is recognized by our standard as a Leghorn that is broken black and white in color, evenly mottled. The rule of color for the new Ancona as now bred in England calls for black with uniform tipping of white on each feather; shanks yellow, spotted with black. This manner of marking is difficult to obtain, and the great difficulty of gaining this color and manner of marking has made them an extremely

**BEES IN WINTER.**  
Some Wrinkles About Managing Them in a Cellar.  
Putting bees in the cellar to winter is the last work we have to do in all their management, so if you have made no provisions to winter them out of doors until it is too late you can still go to the cellar with them. This work is done just at the beginning of steady winter, but if winter has progressed a little you can yet put the bees in the cellar. Do not undertake to do so, however, unless you have some idea of managing bees in the cellar. If one was not aware of the fact that it is a difficult matter to winter bees in a cellar, he might think that just putting them down in the cellar was very easy and the best way to get rid of the winter problem.  
Remember that setting hives of bees in an ordinary cellar will not work, and they would do much better on their summer stand in their summer hives. The cellar in which to keep bees must be of an even temperature, varying but a very few degrees, 45 degrees being about right. If the cellar is not to be used exclusively for the bees, as much of it as is to be used must be set off entirely to itself with a good partition. The apartment the bees are to occupy must be in utter darkness day and night. This part must be free from any disturbance of any kind and must have a ground floor or if not a ground floor the floor should not connect with any other.  
To prepare a place for the hives, get 2 by 4 scantling, place them about sixteen inches apart on a good solid foundation and tack a piece across each end to hold them in place. Now set a row of hives crosswise on this frame. About eight inches of space should be left between each two hives. Remove the bottom boards from the hives, but leave on the lids. Set the second row of hives on top of the first and directly over the eight inch space between the same. The third row may be set on the second in the same manner and may be carried up as high as the ceiling. It takes but a small place to thus winter a large number of colonies, says A. H. Duff in the Kansas Farmer.

**AN ENGLISH PRIZE ANCONA PULLET.**  
fancy fowl. It is claimed that the breed came from Ancona, in Italy. They first came into notice as wonderful layers of beautiful white eggs. They are on the average rather smaller than our Leghorns. The proper style of marking is to have a V shaped white ending to each feather, the white to be rather small or narrow so as not to give the fowl the appearance of being mottled black and white, for the plumage must be black, each feather uniformly tipped with white.  
The tail feathers of these fowls should be black from the skin out and tipped on the end with white. This is as it is demanded by the English standard, but it is noted that a color plate by Ludlow has the main tail feathers of the male white with black ends, while the tail feathers of the females are as described in the standard. As we have bred them in this country they are broken black and white, rather more white than is seen on the Houdan, shanks yellow, spotted with black; shape of comb and carriage like those of the Leghorn.  
They are rather handsome when of good shape and color and are somewhat smaller than the Leghorn should be. They lay a good number of eggs per year, which are about the same size as the eggs of our White Leghorns. They grow quickly and make nice little broilers, not plump or fat looking, but tender and sweet. Quite a number of these fowls have been shown the past few months at our fall fairs. It is said that they have them in Italy in several colors, such as white, yellow and red.—Country Gentleman.

**FOOD FOR EGG PRODUCTION.**  
Narrow, Medium and Wide Rations. The Former the Best.

Experiments were conducted during three moulting seasons at the Rhode Island station to test the results in egg production of feeding a narrow, medium and wide ration to laying fowls.  
Ten hens were used each year in each of three pens designated as pen No. 1 (medium ration), pen No. 2 (narrow ration), pen No. 3 (wide ration). The rations were the same in the trials for each year. The medium ration fed to pen No. 1 consisted of: Morning feed, cracked corn; night feed, a mash of the following proportions: Bran, 13 pounds; cornmeal, 13 pounds; beef scraps, 5 pounds; cottonseed meal, 4 pounds; linseed meal, 3 pounds. (Nutritive ratio, 1 to 5.) The narrow ration fed to pen No. 2 consisted of: Morning feed, oats; night feed, the same as in pen No. 1. At noon three times per week the hens of this pen were fed about two and a half ounces each of green cut bone to narrow the ration. (Nutritive ratio, 1 to 2.8.) The wide ration fed pen No. 3 consisted of: Morning feed, cracked corn; night feed, a mash of proportions as follows: Bran, 14 1/2 pounds; cornmeal, 10 pounds. (Nutritive ratio, 1 to 8.4.)  
It was found that it cost \$1.7711 to produce 181 eggs or \$0.0097 plus for each egg in the case of pen No. 1. Two hundred and fourteen eggs from pen No. 2 cost \$1.7278 to produce, or \$0.008 per egg, while the 114 eggs from pen No. 3 cost \$1.5274, or \$0.0134 per egg.  
If results can be regarded as conclusive, the narrow ration, costing less than the medium and more than the wide, but producing more eggs than either of the other two at a less price per egg, is certainly the cheapest and most satisfactory in the end.  
Chemical analysis of sample of droppings from each pen, collected first, air dried and then ground, showed those from pen No. 1 to contain 4.17 per cent nitrogen. Those from pen No. 2 contained 4.65 per cent nitrogen, and the sample from pen No. 3 contained 3.74 per cent nitrogen.  
This shows that the manure from the narrow ration had the largest per cent of nitrogen, which is another point in favor of using a narrow ration, as nitrogen is the most valuable constituent of manures in general.

**NOTES FROM COLORADO.**  
A Remarkable New Lima Bean For Canning Purposes.  
The latest and most startling canning lima bean is the Wonder Cream from California. It was tried by one man in Colorado the past season, and he secured 600 bushels of seed, all of which he planted next spring for a field crop. We have never heard of this stranger from California, but naturally suppose it must belong to the lima family from Sonora, Mexico, which has added so much to the bean culture of this country, says the Denver Field and Farm, in which the following items also appear:  
**Peanuts on Irrigated Farms.**  
The boys of Colorado who live on irrigated farms have it in their power to break the peanut trust and make some money for themselves at the same time. The peanut plant resists drought bravely, frequently forming a surprisingly large number of pods in very hot, dry weather. Any loamy soil may be expected to raise fair crops of peanuts. From fifty to a hundred bushels to the acre is considered a satisfactory crop, which never fails when irrigated properly.  
**Profitable Peas.**  
During the past season a Boulder county farmer planted ninety acres to Admiral and Alaska canning peas and finds that the former is much the better yielder. He planted two bushels of seed to the acre, in drills of course, and the seed alone cost \$7 an acre. The most of the crop was grown for seed and was sold at \$1.75 a hundred, which brought a total return of \$3,000 in clear profit. The crop also enriched the soil and was profitable in this way more than can be estimated. A neighbor had a patch of fifty acres in peas and made only \$17.50 net an acre, as he was partially hilled out. Still another neighbor had fifty acres in peas and lost money on the venture.  
**Protecting Trees From Rabbits.**  
Young orchard trees can be protected from rabbits by simply wrapping the trunk with closely placed cornstalks, coarse straw or stout paper. Such wrappings are frequently employed, and I am assured by those who have tried them, says H. Garman of Kentucky, that trees so defended are never disturbed by rabbits, though it must be confessed there is no evident reason why they should pay heed to so flimsy a covering when their stout teeth could easily remove it.

**News and Notes.**  
Latest English figures make it appear that Germany now produces one-third of the world's supply of beet sugar, of which she exports no less than 1,250,000 tons after completely supplying her own population.  
Bee keeping is not an agricultural sideshow, as many people suppose, but has attained the dignity of a distinct industry. Three hundred thousand is the estimated number of American apiaries.  
Oregon scientists are credited with the discovery that from refuse and unmerchantable prunes can be produced in four weeks' time vinegar of the highest quality containing a higher percentage of acetic acid than does the best cider vinegar.  
The profits of the present season to the fortunate apple growers of Washington and Oregon have led to a great apple planting boom, especially in the former state.  
Great cracks and sink holes are reported as appearing suddenly in Kansas alfalfa fields to the complete mystification of the farmers.  
The pine needle industry is a new enterprise of the northwest. The needles of the yellow pine are woven into coarse cloth and made into fiber for filling mattresses and pillows.

**IT'S UP TO MICHIGAN.**  
Knox Demands \$70,000 Collected Several Years Ago.  
Washington, Dec. 17.—Atty.-Gen. Knox yesterday made an order to demand of the state of Michigan the \$70,000 held in the state treasury since 1857. It is the money that was collected by the state during the season between the time the state agreed to turn over the St. Mary's canal at the Soo to the United States and the time the federal government took possession of the canal. The state authorities have never admitted that the federal government was entitled to this fund, but the legislature has on different occasions agreed that the money might be used to build a marine hospital at the Soo. The demand of the attorney-general is preliminary to the beginning of a suit by the United States to recover the \$70,000.

**Assaults Turnkey and Escapes.**  
Bay City, Mich., Dec. 17.—John Norton, confined in the Bay county jail awaiting the action of the United States grand jury on a charge of stealing several bags containing mail from the Michigan Central depot platform in Saginaw and rifling them, several months ago, escaped from prison at 6 o'clock last evening and is still at liberty.  
Norton had been allowed the privilege of going into the corridor of the jail to wash his clothes. Yesterday afternoon he stationed himself by the door leading to the jail office, and as Turnkey Feyerabend opened the door and entered with the prisoners' supper, Norton sprang upon him and knocked him down. Then, jumping over the form of the turnkey, Norton rushed through the jail office into the street and disappeared.  
Feyerabend is about 60 years old, and before he could get on his feet the prisoner was far away.

In an item published December 6th of the death of Thomas Kronemeyer, the name of Klompars was by mistake placed in the item instead of Kronemeyer.

### HAMILTON.

Chas. Doud's trial in Allegan, was quite well attended by interested parties.

Several friends of Mr. and Mrs. Hoedley, gave them a pleasant surprise last Thursday evening, the occasion being their twelfth wedding anniversary.

Some fine linen gifts were presented. Plenty of music and games made the evening pass all too soon, and after partaking of choice refreshments the party retired, with many wishes for the future happiness of the couple.

Rev. A. M. Griffith preached his farewell sermon Sunday.

Several pleasure seekers gave Mrs. Clara Peterham a surprise on Saturday evening, it being the lady's birthday.

Several nice gifts were given her by her many friends and a good time was enjoyed by all.

## BEYOND DOUBT.

These Facts Must Convince Every Holland Reader.

That which follows is the experience of a resident of Holland. Incredulity cannot exist about the statement because it can easily be investigated.

Mrs. Jan De Kok, of 214 West 11th st., says: "I was bothered for years more or less with heavy aching pains in my back. I could not rest comfortably and it was painful for me to stoop or to straighten up. Seeing Doan's Kidney Pills so highly recommended I got a box at J. O. Doesburg's drug store and tried them. They relieved me right away and in a short time my complaint disappeared entirely. Doan's Kidney Pills are a fine remedy."

## GLAD CHRISTMAS DAY.

There is gladness in giving. But of course how long this gladness will last depends upon how wise and how well we give. If we only consider how beautiful a present we can give, gladness will only be of a short duration. But if we try to combine the useful with the ornamental, we have the ideal Christmas present—we have given something which will give continual gladness.
